The College proposes to appoint a postdoctoral research associate in connection with an interdisciplinary project entitled Changing Lives. The post is full-time for three years starting as soon as possible. Candidates must hold or be close to completing a doctorate in epidemiology, biostatistics, public health, social and behavioural sciences (e.g. psychology or criminology) or a related discipline. The postholder will be conducting epidemiological analysis examining the impact of childhood adversity on adult health, social and psychiatric outcomes, primarily using secondary data from large birth cohorts.

The postdoctoral research associate will be responsible for research activities such as developing analysis proposals, conducting data analyses, and writing manuscripts. Candidates should have experience conducting longitudinal data analyses with large databases using STATA, R or SPSS and knowledge of or demonstrated interest in childhood adversity, and/or mental health across the life course.

The location of the job will be in Oxford, though candidates will need to be able to travel to Newcastle as part of the position.

The appointment will be made on grade 7 of University Salary Scale, currently £31,604 - £38,833 p.a.

Application forms and further particulars, which include information on how to apply, are available at www.magd.ox.ac.uk/job-vacancies/. The deadline for applications is UK time 12 noon on 24th August 2018.

Magdalen College is an Equal Opportunities Employer.
